

**IN THE CLAIMS**

Kindly amend the claims, without prejudice, without admission, without surrender of subject matter, and without any intention of creating any estoppel as to equivalents, as follows:

1. (Currently Amended) A sports boot, ~~in particular~~ for a board for gliding, such as a snow board, or skating boot, ~~having, on the one hand,~~ comprising a first part (1) in a first material and a second part (17) superposed on said first part and in a second material, and, ~~on the other hand,~~ a reinforcement means (10, 11, 12, 13), wherein the reinforcement means are at least partly formed by at least one frame (13) in synthetic material internally reinforced with mineral or synthetic fibers and positioned at least partially between said parts.

2. (Currently Amended) The boot as claimed in claim 1, wherein the first part is rigid core (1) ~~including, on the one hand,~~ comprising a reinforcement means and constituting, in certain zones, the inner face of the boot that receives a comfort liner, and the second part is an envelope (17) of flexible material covering at least partially the rigid core (1) and itself constituting the inner face of the boot in the zones where the rigid core is absent.

3. (Original) The boot as claimed in claim 1, wherein the synthetic material of the frame is thermoplastic.

4. (Original) The boot as claimed in claim 1, wherein the synthetic material of the frame is heat-moldable.

5. (Original) The boot as claimed in claim 1, wherein the synthetic material of the frame is heat-curable.

6. (Original) The boot as claimed in claim 1, wherein the fibers are in the form of textile layers.

7. (Currently Amended) The boot as claimed in ~~the preceding claim~~claim 6, wherein the fibers are of carbon or KELVAR<sup>®</sup>, or glass fibers.

8. (Currently Amended) The boot as claimed in ~~the preceding claim~~claim 1, wherein the frame is formed by the combination of a number of textile layers of identical or different fibers.

9. (Original) The boot as claimed in claim 7, wherein the fibers are superposed or woven.

10. (Original) The boot as claimed in claim 2, wherein the frame (13) is covered by the flexible envelope.

11. (Original) The boot as claimed in claim 2, wherein the frame (13) is not at least partly covered by the flexible envelope (17).

12. (Currently Amended) The boot as claimed in claim 1, wherein ~~the~~a rigid core (1) comprises athe frame (13) extending transversely under the rigid core, between heel and toe, and obliquely rearward, on each side the rigid core.

13. (Currently Amended) The boot as claimed in claim 1, wherein the rigid core (1) comprises athe frame (13) extending above the heel and obliquely toward the bottom and the front of each side of the rigid core.

14. (Currently Amended) A method for manufacturing athe boot ~~according to the preceding claims~~as claimed in claim 1, wherein, in a first mold, the first material is injected over the reinforcement frame, and then, in a second mold, the second material is over-injected over the assembly obtained from the first mold.
